REPORT OF INDEPENDENT ACCOUNTANTS

(110) Financial Report No. 20002210 To the Board of Directors and Shareholders of Phoenix Silicon International Corporation **Opinion**

We have audited the accompanying parent company only balance sheets of Phoenix Silicon International Corporation (the "Company") as at December 31, 2020 and 2019, and the related parent company only statements of comprehensive income, of changes in equity and of cash flows for the years then ended, and notes to the parent company only financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying parent company only financial statements present fairly, in all material respects, the parent company only financial position of the Company as at December 31, 2020 and 2019, and its parent company only financial performance and its parent company only cash flows for the years then ended in accordance with the "Regulations Governing the Preparation of Financial Reports by Securities Issuers".

Basis for opinion

We conducted our audits in accordance with the "Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants" and generally accepted auditing standards in the Republic of China ("ROC GAAS"). Our responsibilities under those standards are further described in the Independent Accountant's Responsibilities for the Audit of the Parent Company Only Financial Statements section of our report. We are independent of the Company in accordance with the Code of Professional Ethics for Certified Public Accountants in the Republic of China (the "Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the parent company only financial statements of the current period. These matters were addressed in the context of our audit of the parent company only financial statements as a whole and, in forming our opinion thereon, we do not provide a separate opinion on these matters.

Evaluation of inventories

Description

The lithium ion battery products produced by Phoenix Silicon International Corporation's subsidiary (listed using the equity method of investment) produced by Phoenix Battery Corporation, Ltd. (hereinafter referred to as "Phoenix Battery") are yet to be actively promoted by the market. Therefore, the risk of loss on market value decline or obsolescence is higher. Inventories of Phoenix Battery are measured at the lower of cost and net realizable value method. The net realizable value often involves with subjective judgments. In consider the energy division of inventories evaluation results would have a significant impact on financial statements, therefore, we listed the evaluation of inventories as one of the key audit matters.

How our audit addressed the matter

We performed the following key audit procedures in respect of the above key audit matter:

Obtained an understanding of accounting policies on the provision of allowance for inventory valuation losses and validated the accuracy of inventory aging report, as well as sampled and confirmed the consistency of quantities and amounts with detailed inventory listings, verified the dates of movements with supporting documents and ensured the proper categorization of inventory aging report. Evaluated and confirmed the reasonableness of net realizable value for inventories through validating respective supporting documents.

Audit of increase of property, plant and equipment (PP&E)

Description

Please refer to Note 4 (14) of the individual financial report for the accounting policy of property, plant and equipment. Please refer to Notes 6(7) of the individual financial report for the accounting account descriptions of property, plant and equipment.

Phoenix Silicon International Corporation mainly provides the professional processing for semiconductor wafer, such as recycling, thinning and the others. In order to meet customers' demands, Company had to build advanced technology capacities and continue developments. Consider the Company's capital expenditures have been increasing tremendously in this year, therefore, we listed the accounting policy of property, plant and equipment as one of the key audit matters.

How our audit addressed the matter

We performed the following key audit procedures in respect of the above key audit matter: Evaluate and test the effectiveness of relevant internal controls related to the addition and depreciation of property, plant and equipment. Validate the relevant purchase orders, invoices, etc. to confirm that transactions have been properly approved and booked with correct amount. Validate the acceptance report to confirm whether the assets are actually available for use and booked in the catalog of fixed assets at the appropriate time, and whether the depreciation calculations have been correctly started.

Responsibilities of management and those charged with governance for the parent company only financial statements

Management is responsible for the preparation and fair presentation of the parent company only financial statements in accordance with the "Regulations Governing the Preparation of Financial Reports by Securities Issuers", and for such internal control as management determines is necessary to enable the preparation of parent company only financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the parent company only financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including the Audit Committee, are responsible for overseeing the Company's financial reporting process.

Independent accountant's responsibilities for the audit of the parent company only financial statements

Our objectives are to obtain reasonable assurance about whether the parent company only financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ROC GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be

expected to influence the economic decisions of users taken on the basis of these parent company only financial statements.

As part of an audit in accordance with ROC GAAS, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the parent company only financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- 2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- 3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- 4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report to the related disclosures in the parent company only financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- 5. Evaluate the overall presentation, structure and content of the parent company only financial statements, including the disclosures, and whether the parent company only financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- 6. Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Company to express an opinion on the parent company only financial statements. We are responsible for the direction, supervision and

performance of the company audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the parent company only financial statements of the current period and are therefore the key audit matters. We describe these matters in our report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Li, Tien-Yi

Xie, Zhi-Zheng

For and on behalf of PricewaterhouseCoopers, Taiwan February 23, 2021

The accompanying parent company only financial statements are intended only to present the parent company only financial position, parent company only financial performance and parent company only cash flows in accordance with accounting principles and practices generally accepted in the Republic of China and not those of any other jurisdictions. The standards, procedures and practices to audit such parent company only financial statements are those generally applied in the Republic of China.

For the convenience of readers, the independent auditors' report and the accompanying parent company only financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. If there is any conflict between the English version and the original Chinese version or any difference in the interpretation of the two versions, the Chinese-language independent auditors' report and parent company only financial statements shall prevail.

Cash and cash equivalents at end of year	6(1)		\$	1,124,579	\$	1,768,882

<u>Phoenix Silicon International Corporation</u> <u>PARENT COMPANY ONLY STATEMENTS OF CASH FLOWS</u> <u>FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019</u> (Expressed in thousands of New Taiwan dollars)

The accompanying notes are an integral part of these parent company only financial statements.

PHOENIX SILICON INTERNATIONAL CORPORATION NOTES TO THE PARENT COMPANY ONLY FINANCIAL STATEMENTS DECEMBER 31, 2020 AND 2019

(EXPRESSED IN THOUSANDS OF NEW TAIWAN DOLLARS, EXCEPT AS OTHERWISE INDICATED)

1. HISTORY AND ORGANISATION

Phoenix Silicon International Corporation (the "Company") was incorporated in March 1997 and commenced its operations in June 1998. The Company is engaged in the research, design, manufacture, and sales of reclaim wafer, test wafer, product wafer, solar cell, lithium ion battery for energy storage. In order to improve competitiveness and business performance, the Company has carried out specialization and reorganization procedures. On March 7, 2017, organizational adjustments approved by the board of directors to sell the related business (including assets and liabilities) of an existing energy division of the Company to Phoenix Battery Corporation a 100% -owned subsidiary . Phoenix Battery Corporation would issue new shares as consideration for the transfer of business. The base date of sell was July 1, 2017. The Company completed the first cash increase and the registration of increase after the transfer of business was completed on January 24, 2018. As of December 31, 2020, the Company held 25,100 shares of Phoenix Battery Corporation with a shareholding ratio of 71.51%.

2. <u>THE DATE OF AUTHORISATION FOR ISSUANCE OF THE PARENT COMPANY ONLY</u> <u>FINANCIAL STATEMENTS AND PROCEDURES FOR AUTHORISATION</u>

These parent company only financial statements were authorized for issuance by the Board of Directors on February 23, 2021.

3. <u>APPLICATION OF NEW STANDARDS, AMENDMENTS AND INTERPRETATIONS</u>

 (1) Effect of the adoption of new issuances of or amendments to International Financial Reporting Standards ("IFRSs") as endorsed by the Financial Supervisory Commission ("FSC") New standards, interpretations and amendments endorsed by the FSC effective from 2020 are as follows:

New Standards, Interpretations and Amendments	Effective date by International Accounting Standards Board
Amendments to IAS 1 and IAS 8, 'Disclosure Initiative-Definition of	
Material'	January 1, 2020
Amendments to IFRS 3, 'Definition of a business'	January 1, 2020
Amendments to IFRS 9, IAS 39 and IFRS 7 of Interest Rate	
Benchmark Reform	January 1, 2020
Amendment to IFRS 16, 'Covid-19-Related Rent Concessions' Note: Early adoption from January 1, 2020 is allowed by FSC.	June 1, 2020 (Note)

The above standards and interpretations have no significant impact to the Company's financial condition and financial performance based on the Company's assessment. The quantitative impact will be disclosed when the assessment is complete.

(2) Effect of new issuances of or amendments to IFRSs as endorsed by the FSC but not yet adopted by the Company

New Standards, Interpretations and Amendments	Effective date by International Accounting Standards Board				
Amendments to IFRS 4, 'Extension of the temporary exemption from					
applying IFRS 9'	January 1, 2021				
Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16,					
'Interest Rate Benchmark Reform— Phase 2'	January 1, 2021				
The above standards and interpretations have no significant impact to the Company's financial condition and financial performance based on the Company's assessment.					
(3) IFRSs issued by IASB but not yet endorsed by the FSC					
New standards, interpretations and amendments issued by IASB but no	ot yet included in the IFRSs as				

endorsed by the FSC are as follows:

New Standards, Interpretations and Amendments	Effective date by International Accounting Standards Board
Amendments to IFRS 3, 'Reference to the conceptual framework'	January 1, 2022
Amendments to IFRS 10 and IAS 28, 'Sale or contribution of assets	To be determined by
between an investor and its associate or joint venture'	International Accounting
IFRS 17, 'Insurance contracts'	January 1, 2023
Amendments to IFRS 17, 'Insurance contracts'	January 1, 2023
Amendments to IAS 1, 'Classification of liabilities as current or	
non-current'	January 1, 2023
Amendments to IAS 1, 'Disclosure of Accounting Policies'	January 1, 2023
Amendments to IAS 8, 'Definition of Accounting Estimates'	January 1, 2023
Amendments to IAS 16, 'Property, plant and equipment : proceeds	
before intended use'	January 1, 2022
Amendments to IAS 37, 'Onerous contracts—cost of fulfilling a	
contract'	January 1, 2022
Annual improvements to IFRS Standards 2018–2020	January 1, 2022
The above standards and interpretations have no significant impac condition and financial performance based on the Company's assessm	1 1

4. <u>SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES</u>

The principal accounting policies applied in the preparation of these parent company only financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated.

(1)<u>Compliance statement</u>

The parent company only financial statements of the Company have been prepared in accordance with the "Regulations Governing the Preparation of Financial Reports by Securities Issuers".

(2)<u>Basis of preparation</u>

- A. Except for the following items, the parent company only financial statements have been prepared under the historical cost convention:
 - (a) Financial assets (including derivative instruments) at fair value through profit or loss.
 - (b)Defined benefit liabilities recognised based on the net amount of pension fund assets less present value of defined benefit obligation.
- B.The preparation of financial statements in conformity with IFRSs requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Company's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the parent company only financial statements are disclosed in Note 5.

(3) Foreign currency translation

The parent company only financial statements are presented in New Taiwan dollars, which is the Company's functional and the Company's presentation currency.

Foreign currency transactions and balances:

- A. Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are remeasured. Foreign exchange gains and losses resulting from the settlement of such transactions are recognized in profit or loss in the period in which they arise.
- B. Monetary assets and liabilities denominated in foreign currencies at the period end are retranslated at the exchange rates prevailing at the balance sheet date. Exchange differences arising upon re-translation at the balance sheet date are recognized in profit or loss.
- C. All other foreign exchange gains and losses based on the nature of those transactions are presented in the statement of comprehensive income within other gains and losses

(4) Classification of current and non-current items

- A. Assets that meet one of the following criteria are classified as current assets; otherwise they are classified as non-current assets: Assets arising from operating activities that are expected to be realized, or are intended to be sold or consumed within the normal operating cycle;
- (a) Assets held mainly for trading purposes;
- (b) Assets that are expected to be realized within twelve months from the balance sheet date;
- (c) Cash and cash equivalents, excluding restricted cash and cash equivalents and those that are to be exchanged or used to settle liabilities more than twelve months after the balance sheet date.

All assets that do not meet the above criteria are classified as non-current assets.

- B. Liabilities that meet one of the following criteria are classified as current liabilities; otherwise they are classified as non-current liabilities:
 - (a) Liabilities that are expected to be settled within the normal operating cycle;
 - (b) Liabilities arising mainly from trading activities;
 - (c) Liabilities that are to be settled within twelve months from the balance sheet date;
 - (d) Liabilities for which the repayment date cannot be extended unconditionally to more than twelve months after the balance sheet date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

All liabilities that do not meet the above criteria are classified as non-current liabilities.

(5)<u>Cash equivalents</u>

Cash equivalents refer to short-term, highly liquid investments that are readily convertible to known amount of cash and which are subject to an insignificant risk of changes in value. Time deposits that meet the definition above and are held for the purpose of meeting short-term cash commitment in operations are classified as cash equivalents.

(6) Financial assets at fair value through profit or loss

- A. Financial assets at fair value through profit or loss are financial assets that are not measured at amortized cost or fair value through other comprehensive income. Financial assets at amortized cost or fair value through other comprehensive income are designated as at fair value through profit or loss at initial recognition when they eliminate or significantly reduce a measurement or recognition inconsistency.
- B. On a regular way purchase or sale basis, financial assets at fair value through profit or loss are recognized and derecognized using trade date accounting.
- C. At initial recognition, the Company measures the financial assets at fair value and recognizes the transaction costs in profit or loss. The Company subsequently measures the financial assets at fair value, and recognizes the gain or loss in profit or loss.

(7) Financial assets at amortized cost

- A. Financial assets at amortized cost are those that meet all of the following criteria :
 - (a) The objective of the Company's business model is achieved by collecting contractual cash flows.
 - (b) The assets" contractual cash flows represent solely payments of principal and interest.
- B. On a regular way purchase or sale basis, financial assets at amortized cost are recognized and derecognized using trade date accounting.

- C. At initial recognition, the Company measures the financial assets at fair value plus transaction costs. Interest income from these financial assets in included in finance income using the effective interest method. A gain or loss is recognized in profit or loss when the asset is derecognized or impaired.
- D. The Company's time deposits which do not fall under cash equivalents are those with a short maturity period and are measured at initial investment amount as the effect of discounting is immaterial.

(8) Accounts and notes receivable

- A. Accounts receivable entitle the Company a legal right to receive consideration in exchange for transferred goods or rendered services.
- B. The short-term accounts and notes receivable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(9) Impairment of financial assets

The Company has assessed the debt instrument investments measured at amortized cost and accounts receivable or contract assets that contain significant financial components during each balance sheet date. If all of the reasonable and corroborative information (including perspective data) did not significantly increase the credit risk after the initial recognition, the allowance loss was measured via the 12-month expected credit loss amount. If there is a significant increase of credit risk after the initial recognition, the allowance loss is measured by the amount of expected credit loss during the period of existence. For accounts receivable or contract assets that do not contain significant financial components, allowance losses are measured via the amount of expected credit losses over the life of the deposit.

(10) Derecognition of Financial Assets

The Company shall derecognize financial assets when one of the following conditions is met:

- A. Contractual rights to receive cash flows from financial assets have lapsed.
- B. The contractual rights to receive cash flows from financial assets have been transferred, and almost all the risks and rewards of ownership of the financial assets have been transferred.
- C. Transfer of contractual rights to receive cash flows from financial assets, but does not retain control over such financial assets.

(11) Operating leases (lessor)

Payments made under an operating lease (net of any incentives received from the lessor) are recognized in profit or loss on a straight-line basis over the lease term.

(12) Inventories

Inventories are stated at the lower of cost and net realizable value. Cost is determined using the weighted-average method. The cost of finished goods and work in progress comprises raw

materials, direct laboaur, other direct costs and related production overheads (allocated based on normal operating capacity). It excludes borrowing costs. The item by item approach is used in applying the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated cost of completion and applicable variable selling expenses.

- (13) Investments accounted for using equity method / associates
 - A. Subsidiaries refer to entities under the control of the Company. When the Company is exposed to the participation of variable remunerations for said entities or have rights over such variable remunerations and have the power to impact said remunerations of such entities, the Company controls said entities
 - B. Unrealized profit (loss) occurred from the transactions between the Company and subsidiaries have been offset. The accounting policies of the subsidiaries have been adjusted where necessary to ensure consistency with the policies adopted by the Company.
 - C. The Company's share of its subsidiaries' post-acquisition profits or losses is recognized in profit or loss, and its share of post-acquisition movements in other comprehensive income is recognized in other comprehensive income. When the Company's share of losses in a subsidiary equals or exceeds its interest in the subsidiary, the Company continues to recognize losses proportionate to its ownership.
 - D. If changes in the Company's shares in subsidiaries do not result in loss in control (transactions with non-controlling interest), transactions shall be considered as equity transactions, which are transactions between owners. Difference of adjustment of non-controlling interest and fair value of consideration paid or received is recognized in equity.
 - E. Pursuant to the "Regulations Governing the Preparation of Financial Reports by Securities Issuers," profit (loss) of the current period and other comprehensive income in the parent company only financial statements shall equal to the amount attributable to owners of the parent in the parent company only financial statements. Owners' equity in the parent company only financial statements shall equal to equity attributable to owners of the parent in the parent company only financial statements.

(14) Property, plant and equipment

- A. Property, plant and equipment are initially recorded at cost. Borrowing costs incurred during the construction period are capitalized.
- B. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognized. All other repairs and maintenance are

charged to profit or loss during the financial period in which they are incurred.

- C. Other property, plant and equipment apply cost model and are depreciated using the straight-line method to allocate their cost over their estimated useful lives. Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item must be depreciated separately.
- D. The assets' residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each financial year-end. If expectations for the assets' residual values and useful lives differ from previous estimates or the patterns of consumption of the assets' future economic benefits embodied in the assets have changed significantly, any change is accounted for as a change in estimate under IAS 8, 'Accounting Policies, Changes in Accounting Estimates and Errors', from the date of the change. The estimated useful lives of the fixed assets are as follows:

Buildings and structures	4 to 51 years
Machinery and equipment	2 to 10 years
Vehicles	5 to 6 years
Office equipment	3 to 6 years
Leases assets	6 years
Other fixed assets	3 to 6 years

(15) Leasing arrangements (lessee) - right-of-use assets/ lease liabilities

- A. Leases are recognized as a right-of-use asset and a corresponding lease liability at the date at which the leased asset is available for use by the Company. For short-term leases or leases of low value assets, lease payments are recognized as an expense on a straight-line basis over the lease term.
- B. Lease liabilities include the net present value of the remaining lease payments at the commencement date, discounted using the incremental borrowing interest rate. Lease payments are comprised fixed payments, less any lease incentives receivable.
- C. The Company subsequently measures the lease liability at amortized cost using the interest method and recognizes interest expense over the lease term. The lease liability is remeasured and the amount of remeasurement is recognized as an adjustment to the right-of-use asset when there are changes in the lease term or lease payments and such changes do not arise from contract modifications.

Right-of-use assets are initially measured at cost, which includes:

- (a) The cost originally measured for the lease liability, and
- (b) Any original direct costs incurred before lease asset is available for using.

The following measurements will adopt cost model. The lease asset will be depreciated based on the period which is lower between the durability of the asset and the maturity of the leasing. The right-of-use asset will be adjusted by any possible change of the original measurements when the lease liability is reassessed

(16) Intangible assets

- A. Computer software is stated at cost and amortized on a straight-line basis over its estimated useful life of 2 to 10 years.
- B. Other Intangible assets mainly are expenditure for laying electrical wires and cables etx.is stated at cost and amortized on a straight-line basis over its estimated useful life of 3 years.

(17) Impairment of non-financial assets

The Company assesses at each balance sheet date the recoverable amounts of those assets where there is an indication that they are impaired. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell or value in use. When the circumstances or reasons for recognizing impairment loss for an asset in prior years no longer exist or diminish, the impairment loss is reversed. The increased carrying amount due to reversal should not be more than what the depreciated or amortized historical cost would have been if the impairment had not been recognized.

(18) Borrowings

Refers to long-term from bank. When the original recognition is based on the fair value less the trade costs, any subsequent difference between the price and the redemption value after deducting the transaction cost shall be recognized as interest expense in profit or loss using the effective interest method during the circulation period according to the amortization procedure.

(19) Accounts payable

- A. Accounts payable are liabilities for purchases of raw materials, goods or services are those resulting from operating activities.
- B. The short-term notes and accounts payable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(20) Financial liabilities at fair value through profit or loss

- A. Financial liabilities at fair value through profit or loss are financial liabilities held for trading. Financial liabilities are classified in this category of held for trading if acquired principally for the purpose of repurchasing in the short-term. Derivatives are also categorized as financial liabilities held for trading unless they are designated as hedges. When a financial liability meets one of the following conditions, it is designated at fair value through profit or loss when it is originally recognized:
 - (a) Is a mixed (combined) contract; or
 - (b) Eliminate or significantly reduce the measurement inconsistencies; or
 - (c) An instrument whose performance is managed and evaluated on a fair value basis, based on written risk management or strategies.

B. Financial liabilities at fair value through profit or loss are initially recognized at fair value. Related transaction costs are expensed in profit or loss. These financial liabilities are subsequently remeasured and stated at fair value, and any changes in the fair value of these financial liabilities are recognized in profit or loss.

(21) Convertible Corporate Bonds Payable

The convertible corporate bonds issued by the Company shall be embedded with a conversion right (i.e., the holder can choose to convert them into the ordinary shares of the Company, and convert a fixed amount into a number of shares). At the initial issuance, the issue price shall be classified into financial assets, financial liabilities, or equity according to the conditions of issuance and be handled as follows:

- A. Call options and put options embedded in convertible corporate bonds are recognized initially at net fair value as 'financial assets or financial liabilities at fair value through profit or loss'. They are subsequently remeasured and stated at fair value on each balance sheet date; the gain or loss is recognized as 'gain or loss on valuation of financial assets or financial liabilities at fair value through profit or losses.
- B. The host contract of corporate bonds: During original recognition, the difference between the fair value measured and the redemption value shall be recognized as payable corporate premium/discount. Subsequently, the effective interest method by amortization procedure shall be adopted during the circulation period to be recognized as profit or loss, and treated as an adjustment item for "financial costs."
- C. Embedded conversion rights (in accordance with the definition of equity): At the time of the original recognition, the residual value after the issuance amount deducted the aforesaid "financial assets at fair value through profit or loss" and "corporate bonds payable" shall be listed as the "capital reserve stock option." No subsequent re-measurement shall be provided.
- D. Any transaction costs directly attributable to the issuance shall be allocated to the various liability and equity components according to the various original book value ratio components as described above.
- E. When a holder converts, the liability component of the account (including "corporate bonds payable" and financial assets or liabilities at fair value through profit or loss, designated as upon initial recognition) shall be handled according to the subsequent measurement method for its category. Then the aforesaid liability component book value plus the "capital reserve stock option" book value shall serve as the issuance cost for the ordinary share conversion.

(22) Derecognition of financial liabilities

Financial liability is derecognized when the obligation under the liability specified in the contract is discharged or cancelled or expires.

(23) Non-hedging and embedded derivatives

- A. Non-hedging derivatives are initially recognized at fair value on the date a derivative contract is entered into and recorded as financial assets or financial liabilities at fair value through profit or loss. They are subsequently remeasured at fair value and the gains or losses are recognized in profit or loss.
- B. A mixed contract of financial assets embedded in derivatives, at the time of the original recognition, determines that the overall hybrid tool is classified as financial assets measured at fair value through gains and losses, financial assets measured at fair value through other gains and losses, and financial assets measured at amortized cost.
- C. The non-financial asset hybrid contract embedded in the derivative instrument determines whether the embedded derivative is closely related to the economic characteristics and risk of the main contract in the original recognition according to the terms of the contract to determine whether to separate or not. When it is closely related, the overall blending tool is treated according to its nature according to appropriate criteria. When it is not closely related, the derivative is separated from the principal contract and is treated as a derivative. The principal contract is treated according to its nature on the basis of appropriate criteria; or the overall recognition at the original recognition is a financial liability measured at fair value through profit or loss.

(24) Provisions

Provisions are recognized when the Company has a present legal or constructive obligation as a result of past events, and it is probable that an outflow of economic resources will be required to settle the obligation and the amount of the obligation can be reliably estimated. Provisions are measured at the present value of the expenditures expected to be required to settle the obligation on the balance sheet date, which is discounted using a pre-tax discount rate that reflects the current market assessments of the time value of money and the risks specific to the obligation, the discounted amortization is recognized as interest expense. No future operating losses shall be recognized as a liability reserve.

(25) Employee benefits

A. Short-term employee benefits

Short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in respect of service rendered by employees in a period and should be recognized as expense in that period when the employees render service.

B. Pensions

(a) Defined contribution plans

For defined contribution plans, the contributions are recognized as pension expense when they are due on an accrual basis. Prepaid contributions are recognized as an asset to the extent of a cash refund or a reduction in the future payments.

(b) Defined benefit plans

- I. Net obligation under a defined benefit plan is defined as the present value of an amount of pension benefits that employees will receive on retirement for their services with the Company in current period or prior periods. The liability recognized in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets. The net defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The rate used to discount is determined by using interest rates of high- quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension liability; when there is no deep market in high-quality corporate bonds, the Company uses interest rates of government bonds (at the balance sheet date) instead.
- II. Remeasurements arising on defined benefit plans are recognized in other comprehensive income in the period in which they arise and are recorded as retained earnings.
- III. The past service cost related expenses shall immediately be recognized as profits or losses.
- C. Employees' compensation and directors' remuneration

Employees' compensation and directors' remuneration are recognized as expense and liability, provided that such recognition is required under legal or constructive obligation and those amounts can be reliably estimated. Any difference between the resolved amounts and the subsequently actual distributed amounts is accounted for as changes in estimates. If employee compensation is distributed by shares, the Company calculates the number of shares based on the closing price at the previous day of the Board meeting resolution.

(26) Income tax

- A. The tax expense for the period comprises current and deferred tax. Tax is recognized in profit or loss, except to the extent that it relates to items recognized in other comprehensive income or items recognized directly in equity, in which cases the tax is recognized in other comprehensive income or equity.
- B. The current income tax expense is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in accordance with applicable tax regulations. It establishes provisions where appropriate based on the amounts expected to be paid to the tax authorities. An additional tax is levied on the unappropriated retained

earnings and is recorded as income tax expense in the year the stockholders resolve to retain the earnings.

- C. Deferred tax is recognized, using the balance sheet liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the parent company only balance sheet. However, the deferred tax is not accounted for if it arises from initial recognition of goodwill or of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit nor loss. Deferred tax is provided on temporary differences arising on investments in subsidiaries and associates, except where the timing of the reversal of the temporary difference is controlled by the Company and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred tax asset is realized or the deferred tax liability is settled.
- D. Deferred tax assets are recognized only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised. At each balance sheet date, unrecognized and recognized deferred tax assets are reassessed.
- E. If a change in tax rate is enacted or substantively enacted, the Company recognizes the effect of the change immediately in the interim period in which the change occurs. The effect of the change on items recognized outside profit or loss is recognized in other comprehensive income or equity while the effect of the change on items recognized in profit or loss is recognized in profit or loss.
- (27) Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds.

(28) Dividends

Dividends are recorded in the Company's financial statements in the period in which they are resolved by the Company's shareholders. Cash dividends are recorded as liabilities; stock dividends are recorded as stock dividends to be distributed and are reclassified to ordinary shares on the effective date of new shares issuance.

- (29) Income Recognition
 - A. Sales of goods
 - (a) The Company manufactures and sells semiconductor wafer and lithium ion battery related products. Sales are recognized when control of the products has transferred, being when the products are delivered to the customers, and there is no unfulfilled obligation that could affect the customer's acceptance of the products. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence

and loss have been transferred to the wholesaler, and either the wholesaler has accepted the products in accordance with the sales contract, or the Company has objective evidence that all criteria for acceptance have been satisfied.

- (b) The Company provides standard warranty on the products sold, and has the obligation to maintain the products. The liabilities are recognized when the goods are sold.
- (c) Accounts receivable are recognized when the goods are delivered to the customer. Since the Company has unconditional rights to the contract price from that point on time, it is only necessary to collect the consideration from the customer when the time comes.
- B. Service revenue
 - The Company provides semiconductor foundry and related services. The Company considers:
 - (a) Customer controls the provided raw materials and the Company receives the instruction from the customer on providing process services and subsequent treatments •
 - (b) The Company provides process services to create or enhance an asset which solely provided and controlled by the customer. The Company has no right to transfer the asset for another use.

As the asset ownership belongs to the customer, who bears the significant risk and rewards and rights on the use of the asset, the Company recognizes process services revenue based on the progress towards completion of performance obligation during the service period.

The degree of completion for the Company's process service shall be determined based on the actual service cost that have occurred over the total service cost.

The Company provides process services according to the customers' specifications. So the service cost required for the investment is not incurred on average during the service period. The Company believes that it is appropriate to measure the completion of the performance obligations for the customers in the manner described above. The customer pays the contract price in accordance with the payment schedule agreed upon, and is recognized as a contract assets when the services provided by the Company exceed the customer's payables, and are recognized as contract liabilities if the customer pays more than the services provided by the Company.

C. Segment of Financial components

Some of contracts the Company commits to transfer merchandises or services to customers, and customers although make payments within one year. Therefore, the Company does not adjust the transaction price in order to reflect the monetary time value.

5. <u>CRITICAL ACCOUNTING JUDGEMENTS, ESTIMATES AND KEY SOURCES OF</u> <u>ASSUMPTION UNCERTAINTY</u>

The preparation of these parent company only financial statements requires management to make critical judgements in applying the Company's accounting policies and make critical assumptions and estimates concerning future events. Assumptions and estimates may differ from the actual results and

are continually evaluated and adjusted based on historical experience and other factors. Such assumptions and estimates have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year and the related information is addressed below :

(1)Critical judgements in applying the Company's accounting policies

None.

(2) Critical accounting estimates and assumptions

Evaluation of inventories

As inventories are stated at the lower of cost and net realizable value, the Company must determine the net realizable value of inventories on balance sheet date using judgements and estimates. Due to the rapid technology innovation, the Company evaluates the amounts of normal inventory consumption, obsolete inventories or inventories without market selling value on balance sheet date, and writes down the cost of inventories to the net realizable value. Such an evaluation of inventories is principally based on the demand for the products within the specified period in the future. Therefore, there might be material changes to the evaluation.

As of December 31, 2020, the carrying amount of inventories was \$143,001.

6. DETAILS OF SIGNIFICANT ACCOUNTS

(1) Cash and cash equivalents

	December 31, 2020		December 31, 2019		
Cash on hand and revolving funds	\$	390	\$	364	
Demand deposits		754,589		741,018	
Deposit account		369,600		1,027,500	
Total	\$	1,124,579	\$	1, 768,882	

A.The Company transacts with a variety of financial institutions all with high credit quality to disperse credit risk, so it expects that the probability of counterparty default is remote.

B.The Company has no cash and cash equivalents pledged to others. Pledged deposit account information is provided in other non-current assets Note 8.

(2) Financial assets at fair value through profit or loss-current

Item	December 31, 2020		Decem	ber 31, 2019
Current Items:				
Financial assets measured compulsorily at fair				
value through profit or loss				
Derivative instruments	\$	595	\$	1,327

A.The breakdown of financial assets measured at fair value through profit or loss recognized as profit (or loss) is as follows:

	2020		2019
Financial assets measured compulsorily at			
fair value through profit or loss			
Derivative instruments	\$	7,218	\$ 3,548

B. The transactions and contracts information of the derivative financial assets undertaken by the Company not under hedge accounting were as follows:

	December 31, 2020				
Non-hedging derivative assets	Contract	Contract			
Tion neaging derivative assets	(Notional	l amount)	period		
Current items :			Nov. 11, 2020		
Forward exchange contracts	USD	1,880	~Feb. 19, 2021		

]	, 2019		
Non-hedging derivative assets		Contract amount (Notional amount)		
Current items :			Oct. 25, 2019	
Forward exchange contracts	USD	4,000	~Feb. 7, 2020	

The Company entered into derivative contracts to manage exposures due to fluctuations of foreign exchange rates. The Company did not apply hedge accounting treatment for these derivative contracts.

C.For information on the credit risk of financial assets measured by fair value through profit or loss, please refer to Note 12 (2).

(3) Financial assets measured at amortized of	cost
---	------

Item	December 31, 2020		December 31, 2019		
Current Items:					
Time deposits over three months	\$	500	\$		-
Non Current Items:					
Pledged time deposit	\$	12,417	\$		-
A. The breakdown of financial assets measured loss is as follows:	at amortized	cost and	recognize	d in profi	t and
	2020)		2019	
Interest income	\$	127	\$		_

B. Please refer to Note 8 for details of the circumstances in which the company provides financial

assets measured at amortized cost as pledge guarantees.

- C. For information on the credit risk of financial assets measured by amortized cost, please refer to Note 12 \ (2).
- (4) Accounts and notes receivable

	Decemb	er 31, 2020	Decem	ber 31, 2019
Accounts notes	\$	100	\$	156
Accounts receivable		332,634		346,569

Land	\$	8,330	\$	7,180	
Transportation equipment		1,330		1,035	
	\$	9,660	\$	8,215	

- D. For the year ended December 31, 2020 and 2019, additions to right-of-use assets was \$37,675 and \$3,192.
- E. The information on profit and loss accounts relating to lease contracts is as follows:

	_	2020	_	2019
Items affecting profit or loss				
Interest expense on lease liabilities	\$	3,709	\$	3,148
n short-term lease contracts		2,847		4,284
Expenses for lease of low-value assets		316		322
	1	101	C	1

- F. For the year ended December 31, 2020 and 2019, the Company's total cash outflow for leases was \$14,956 and . \$14,566.
- G. Extension and termination options

In determining the lease term, the Company takes into consideration all facts and circumstances that create an economic incentive to exercise an extension option or not to exercise a termination option. The assessment of lease period is reviewed if a significant event occurs which affects the assessment.

- (9) Lease transactions-Lessor
 - A. The asset leased out by the Company is a building. The lease contract period is 5 years. The lease contract is negotiated individually and contains various terms and conditions. In order to preserve the use of leased assets, lessees are usually required not to use the leased assets as loan guarantees.

- B. In the year of 2020 and 2019, the Company recognized rental income of NT \$ 5,058 and NT \$ 3,967 based on operating lease contracts. There is no change in lease payments.
- C. The analysis of the lease payments of the assets leased out by the Company under operating leases on maturity date is as follows :

- A. Domestic conversion of corporate bonds issued by the company
 - (a) Issuance conditions for the first unsecured conversion of corporate bonds in the company are as follows:

The company is approved by the relevant authorities to raise and issue the first unsecured conversion company debt (referred to as "This conversion company debt"), the total issue of \$1,000,000 at the coupon rate of 0%, for an issuance period of 3 years, circulation period from November 13, 2019 to November 13, 2022. When this conversion company debt expires, it will be repaid in cash in the denomination of the bond. This conversion company debt has been listed for trading at the Securities Counter Trading Center as of November 13, 2019.

- (b) The corporate bonds held by the Company shall be converted into ordinary shares of the Company from three months after the bond issuance by the Company until the maturity date. The converted new shares have the same rights and obligations as the ordinary shares of the Company.
- (c) The conversion price of this conversion company debt shall be determined according to the pricing model stipulated in the conversion method, and the conversion price shall be adjusted in the event of the anti-dilution clause of the company in accordance with the pricing model stipulated in the conversion method. The conversion price will be re-determined on the base date according to the pricing model stipulated in the conversion method.
- (d) Bondholders can require the company to buy back the conversion company bonds at 0.5001% interest compensation rate on the face value of the bonds after holding them over two years.
- (e) In the period of circulation from three months after the issuance of the convertible

corporate bonds to thirty business days before the maturity of the bonds. If the closing price of the company's common shares exceeds 30% of the current conversion price for 30 consecutive business days, the company has rights to buy back all its bonds in cash at the face value of the bonds within thirty business days thereafter.

- (f) In the period of circulation from three months after the issuance of the convertible corporate bonds to thirty business days before the maturity of the bonds. If the closing price of the company's common shares is lower 10% of the current conversion price for 30 consecutive business days, the company has rights to buy back all its bonds in cash at the face value of the bonds any time thereafter.
- (g) According to the conversion method, all of the corporate bonds recovered (including those bought back from the Taipei Exchange), repaid, or converted shall be written off by the Company; and all rights and obligations that are attached to corporate bonds will also be reduced and will not be issued.
- B. When issuing convertible corporate bonds, the Company shall, in accordance with the provisions of international Accounting standard 32nd "Financial instruments: expression", separate the right of conversion of the nature of equity from the constituent elements of each liability, and account for the "capital reserve-equity" \$132,294. The other embedded buying and selling rights, according to IAS 9 "Financial instruments: recognition and measurement" provisions, because it is not closely related to the economic characteristics and risks of the main contract debt commodities, so it is separated and treated with its net account "financial liabilities-flows measured at fair value through profit and loss". The effective interest rate for the separation of COR contractual obligations is 1.56%.

Information about pledged to others as collateral is provided in Note 8.

Note : Accordance with the contractual arrangements, the group should maintained half years of designated net debt ratio and interest repayments ability within duration of loan.

(14) Pension

A.

- (a) The Company has a defined benefit pension plan in accordance with the Labor Standards Law, covering all regular employees' service years prior to the enforcement of the Labor Pension Act on July 1, 2005 and service years thereafter of employees who chose to continue to be subject to the pension mechanism under the Law. Under the defined benefit pension plan, two units are accrued for each year of service for the first 15 years and one unit for each additional year thereafter, subject to a maximum of 45 units. Pension benefits are based on the number of units accrued and the average monthly salaries and wages of the last 6 months prior to retirement. The Company contributes monthly an amount equal to 2% of the employees' monthly salaries and wages to the retirement fund deposited with Bank of Taiwan, the trustee, under the name of the independent retirement fund committee. Also, the Company would assess the balance in the aforementioned labor pension reserve account by December 31, every year. If the account balance is insufficient to pay the pension calculated by the aforementioned method to the employees expected to qualify for retirement in the following year, the Company will make contributions for the deficit by next March.
- (b) The amounts recognized in the balance sheet are determined as follows:

Pension fund contribution		-	(829)		(829)
Paid pension	(908)		908			
December 31	\$	39,226	(\$	19,113)		\$ 2	0,113

- (d) The Bank of Taiwan was commissioned to manage the Fund of the Company's defined benefit pension plan in accordance with the fund's annual investment and Remeasurements: plan and the "Regulations for Revenues, Expenditures, Safeguard and Utilisation of the Labor Retirement Fund" (Article 6: The scope of utilisation for the Fund includes deposit in domestic or foreign financial institutions, investment in domestic or foreign listed, over-the-counter, or private placement equity securities, investment in domestic or foreign real estate securitization products, etc.). With regard to the utilisation of the Fund, its minimum earnings in the annual distributions on the final financial statements shall be no less than the earnings attainable from the amounts accrued from two-year time deposits with the interest rates offered by local banks. If the earnings is less than aforementioned rates, government shall make payment for the deficit after being authorized by the Regulator. The Company has no right to participate in managing and operating that fund and hence the Company is unable to disclose the classification of plan asset fair value in accordance with IAS 19 paragraph 142. The composition of fair value of plan assets as of December 31, 2020 and 2019 is given in the Annual Labor Retirement Fund Utilisation Report announced by the government.
- (e) The principal actuarial assumptions used were as follows:

	2020	2019
Discount rate	0.500%	0.875%
Future salary increases	3.500%	3.500%

Future mortality rate was estimated based on the 5th Taiwan Standard Ordinary Experience Mortality Table for the years ended December 31, 2020 and 2019.

Because the main actuarial assumption changed, the present value of defined benefit obligation is affected. The analysis was as follows:

	Discount rate			F	Future salary increases			
		ncrease).25%		crease .25%		crease .25%	D	ecrease 0.25%
December 31,2020								
Effect on present value of defined benefit obligation	(\$	1,348)	\$	1,413	\$	1,350	(\$	1,296)
December 31,2019								
Effect on present value of defined benefit obligation The sensitivity analysis above	<u>(\$</u> e is ba	1,399) used on on	\$ e ass	1,468 umption	\$ which	1,409 changed	(\$ l whil	$\frac{1,350}{1,350}$ e the other

The sensitivity analysis above is based on one assumption which changed while the other conditions remain unchanged. In practice, more than one assumption may change all at once. The method of analysing sensitivity and the method of calculating net pension liability in the balance sheet are the same.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous period.

- (f) Expected contributions to the defined benefit pension plans of the Company for the year ending December 31, 2021 amount to \$871.
- (g) As of December 31, 2020, the weighted average duration of that retirement plan is 13.8 years.

The analysis of timing of the future pension paym	nent was as follows:	
Within 1 year	\$	210
1~2 years		938
2~5 years		8,677
5~10 years		4,354
	\$	14,179

Β.

- (a) Effective July 1, 2005, the Company has established a defined contribution pension plan (the "New Plan") under the Labor Pension Act (the "Act"), covering all regular employees with R.O.C. nationality. Under the New Plan, the Company contributes monthly an amount based on 6% of the employees' monthly salaries and wages to the employees' individual pension accounts at the Bureau of Labor Insurance. The benefits accrued are paid monthly or in lump sum upon termination of employment.
- (b) The pension costs under the defined contribution pension plans of the Company for the years ended December 31, 2020 and 2019 were \$25,469 and \$22,839, respectively.
- (15) <u>Provision</u>

	nmissioning abilities
2020	
January 1	\$ 14,194
Discounting of amortization	698
December 31	\$ 14,892

The analysis of provisions was as follows:

	Decem	ber 31, 2020	December 31, 2019		
Non-current	\$	14,892	\$	14,194	
D					

Decommissioning liabilities

In accordance with the applicable agreements or the law/regulation requirement, the Company bears dismantling, removing the asset and restoring the site obligations for certain base stations in the future. Provision is recognized for the present value of costs to be incurred for dismantling, removing the asset and restoring the site. The Company expects those liabilities will occur in the next 5 to 20 years.

(16) <u>Share capital</u>

As of December 31, 2020, the Company's authorized capital was \$2,000,000, consisting of 200,000 thousand shares of ordinary stock (including 20,000 thousand shares reserved for employee stock options), and the paid-in capital was \$1,324,080 with a par value of \$10 (in

dollars) per share. All proceeds from shares issued have been collected. The beginning balance and closing balance of the number of the Company's ordinary shares outstanding of the period remain the same as in previous two periods.

		Unit : share
	2020	2019
January 1/ December 31	132,408,000	132,408,000

....

(17) <u>Capital surplus</u>

(1

Pursuant to the R.O.C. Company Act, capital surplus arising from paid-in capital in excess of par value on issuance of common stocks and donations can be used to cover accumulated deficit or to issue new stocks or cash to shareholders in proportion to their share ownership, provided that the Company has no accumulated deficit. Further, the R.O.C. Securities and Exchange Act requires that the amount of capital surplus to be capitalised mentioned above should not exceed 10% of the paid-in capital each year. Capital surplus should not be used to cover accumulated deficit unless the legal reserve is insufficient.

A. According to the Company's Articles of Association, if there is a surplus in the annual final accounts, it should first make up for the losses, pay taxes, and deposit 10% as the statutory surplus reserve. However, the statutory surplus reserve is not included in the total capital. The Company shall provide or revolve special surplus reserves as needed. The balance plus the previously undistributed surplus is the distributable surplus. Depending on the Company's operating conditions, the Board of Directors shall make the shareholder's dividend and dividend distribution proposal, and submit the proposal to the shareholders' meeting for resolution.

- B. When forming its dividend policy, the Corporation considers various factors such as its plans relating to current and future development, the overall investment environment, its financial needs, competition in the domestic and foreign markets, as well as the interest of shareholders and the principles of stability and balance in the distribution of dividends. Each year it will set aside as shareholder dividends an amount of not less than 10% of the earnings available for distribution. Dividends to shareholders may be distributed in cash or shares, but in any event the amount of cash dividends may not be less than 50% of the total dividends.
- C. Except for covering accumulated deficit or issuing new stocks or cash to shareholders in proportion to their share ownership, the legal reserve shall not be used for any other purpose. The use of legal reserve for the issuance of stocks or cash to shareholders in proportion to their share ownership is permitted, provided that the distribution of the reserve is limited to the portion in excess of 25% of the Company's paid-in capital.
- D. In accordance with the regulations, the Company shall set aside special reserve from the debit balance on other equity items at the balance sheet date before distributing earnings. When debit balance on other equity items is reversed subsequently, the reversed amount could be included in the distributable earnings.
- E. The appropriation of 2019 and 2018 earnings had been resolved at the stockholders' meeting on May 25, 2020 and May 24, 2019, respectively. Details are summarized below:

A. According to the Company's Articles of Association, if the Company makes a profit, it will pay 10%~15% of the employee's compensation and 2% as remuneration for Directors according to the profit status of the current year.

B. The estimated amount of compensations for employees in 2020 and 2019were \$12,860 and \$77,951, respectively. The estimated amount of remunerations for the Directors were \$2,572 and \$10,393, respectively. The aforesaid amount is accounted for in the salary expense account. 10% and 2% were estimated in 2020 according to the profitability of the year.

The amounts resolved by the Board of Directors for the 2019 compensations for employees, remunerations for Directors, and the amount recognized in the 2019 financial report are consistent.

Information on the compensations for employees as well as remunerations for Directors which were approved by the Board of Directors of the Company can be obtained from the Market Observation Post System (MOPS).

(1)Capital management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to provide returns for shareholders and to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt. The Company monitors capital on the basis of the gearing ratio. This ratio is calculated as total borrowings divided by total capital. Total capital is calculated as equity as shown in the separate balance sheet plus total borrowings.

During the year ended December 31, 2020, the Company's strategy, which was unchanged from 2019, was to maintain the gearing ratio at a reasonable level of risk. The gearing ratios at December 31, 2020 and 2019 were as follows:

	Decembe	er 31, 2020	Dece	ember 31	1, 2019
Total borrowings	\$	1,906,403	3 \$		1,556,635

B. Financial risk management policies

- (a) The Company's activities expose it to a variety of financial risks: market risk (including foreign exchange risk, interest rate risk and price risk), credit risk and liquidity risk. To minimize any adverse effects on the financial performance of the Company, derivative financial instruments, such as foreign exchange forward contracts are used to hedge certain exchange rate risk, and cross derivative instruments to hedging purposes, and not for trading or speculation.
- (b) Risk management is carried out by a treasury department (Company treasury) under policies approved by the Board of Directors. Company treasury identifies, evaluates and hedges financial risks in close co-operation with the Company's operating units. The Board provides written principles for overall risk management, as well as written policies covering specific areas and matters, such as foreign exchange risk, interest rate risk, credit risk, use of derivative financial instruments and non-derivative financial instruments, and investment of excess liquidity.
- C. Significant financial risks and degrees of financial risks
 - (a) Market risk

Foreign exchange risk

I. Management has set up a policy to require the Company to manage their foreign exchange risk against their functional currency. The companies are required to hedge their entire foreign exchange risk exposure with the Company treasury. Exchange rate risk is measured through a forecast of highly probable USD and JPY expenditures. Forward foreign exchange contracts are adopted to minimize the volatility of the exchange rate affecting cost of forecast inventory purchases.

- II. The Company hedges foreign exchange rate by using forward exchange contracts. However, the Company does not adopt hedging accounting. Details of financial assets or liabilities at fair value through profit or loss are provided in Note 6(2) and 6(10).
- III. The Company's businesses involve some non-functional currency operations. The information on assets and liabilities denominated in foreign currencies whose values would be materially affected by the exchange rate fluctuations is as follows:

		Dec	cember 31, 2020

IV. The total exchange loss, including realised and unrealised arising from significant

foreign exchange variation on the monetary items held by the Company for the years ended December 31, 2020 and 2019, amounted to \$19,142 and \$6,895, respectively.

Cash flow and fair value interest rate risk

- I. The Company's interest rate risk mainly arises from short-term loans and long-term loans issued at floating rates, which exposes the Company to cash flow interest rate risk. In 2020 and 2019, the Company's loans issued at floating rates are mainly valuated in NTD. The long-term fixed-rate corporate bonds issued by the Company have no interest rate risk and fair value interest rate risk.
- II. The Company's loans are measured at amortized cost and the annual interest rate will be repriced every year according to the contract. Therefore, the Company is exposed to the risk of future market interest rate changes.
- III. For the years ended December 31, 2020 and 2019, it is estimated that a general increase or decrease of 0.25% in interest rates, with all other variables held constant, would decrease or increase the Company's profit before tax approximately by \$2,319 and \$2,315, respectively, mainly due to the Company's floating rate on bank loans.
- (b) Credit risk
 - I. Credit risk refers to the risk of financial loss to the Company arising from default by the clients or counterparties of financial instruments on the contract obligations. The main factor is that counterparties could not repay in full the accounts receivable based on the agreed terms, and the contract cash flows of financial assets at amortised cost, at fair value through profit or loss and at fair value through other comprehensive income.
 - II. The Company regularly monitors and inspects the trading customer's credit limit based on its credit status and the market conditions, and would make adjustments in real time to manage credit risk. The Company only deals with banks and financial institutions with good credit ratings, so it is not expected to suffer credit risk as a result.
 - III. The Company manages their credit risk taking into consideration the entire Company's concern. According to the Company's credit policy, each local entity in the Company is responsible for managing and analysing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. Internal risk control assesses the credit quality of the customers, taking into account their financial position, past experience and other factors. Individual risk limits are granted by the board of directors based on internal or external ratings, and the usages of credit lines is monitored regularly.
 - IV. The company's acknowledgement of the contract as a situation of default is as follows: When the contract amount is expected to be uncollectible and it is necessary to transfer it to overdue receivable, it is deemed that a default has occurred.

- V. The Company classifies customers' accounts receivable, contract asset and right-of-use asset in accordance with customer types. The Company applies the modified approach using provision matrix to estimate expected credit loss under the provision matrix basis.
- VI. The following indicators are used to determine whether the credit impairment of debt instruments has occurred:
 - i. It becomes probable that the issuer will enter bankruptcy or other financial difficulties ;
 - ii. The disappearance of an active market for that financial asset because of financial difficulties ;
 - iii. Default or delinquency in interest or principal repayments.
- VII. The Company used the forecas tability of consideration to adjust historical and timely information to assess the default possibility of notes receivable, accounts receivable, accounts receivable—related parties, contract asset, other receivable, and other receivables of allowance loss—related parties.

	du to	lot past e and up 90 days ast due	d	-180 ays t due	d	-270 ays t due	d	-360 ays t due	days	Т	otal

December 31	\$		\$	47	\$		\$	<u>-</u> .	\$	_	\$	<u> </u>

(c) Liquidity risk

- I. Cash flow forecasting is performed by individual operating entities within the Company and is aggregated by the Company's Finance Department. The Company's Finance Department shall monitor and forecast the Company's liquidity needs, ensure sufficient funds to meet operational needs, maintain sufficient unencumbered loan commitments at all times so the Company does not violate the relevant loan limits or terms. Such forecasts must take into account the Company's debt financing plans, debt obligations, compliance with the internal balance sheet's financial ratio targets.
- II. Surplus cash over and above balance required for working capital management are invested in interest bearing current accounts, time deposits, money market deposits and marketable securities. The chosen instruments have appropriate maturities or sufficient liquidity to provide sufficient headroom as determined by the abovementioned forecasts. As of December 31, 2020 and 2019, the Company held money market positions of \$ 1,124,189 and \$1,768,518, other current assets of \$ 500 and \$0 and other non-current assets of \$ 12,417 and \$10,794 respectively. It is expected to generate cash flow immediately to manage liquidity risk.
- III. The Company's unused loan amounts are detailed as follows

	Dece	ember 31, 2020	December 31, 2019		
Floating rate					
Due within 1 Year	\$	1,442,116	\$	907,200	
Due over 1 Year		1,188,800		3,000	
Fixed Interest Rate					
Due within 1 Year		-		-	
Due over 1 Year		_			
	\$	2,630,916	\$	910,200	

IV. The following table reflects the non-derivative financial liabilities of the Company and the derivative financial liabilities delivered in net or total amount grouped according to the relevant maturity dates. Non-derivative financial liabilities are analyzed based on the remaining period from the balance sheet date to the contractual maturity date. Derivative financial liabilities are analyzed based on the remaining period from the balance sheet date to the expected maturity date. The contractual cash flow amount disclosed in the following table is the undiscounted amount.

December 31, 2020 <u>Non-derivative financial</u>	6 Months or Less	6 Months to 1 Year	Within <u>1 to 2 Years</u>	2 Years or Above

(3) Fair value information

A. The different levels that the inputs to valuation techniques are used to measure fair value of financial and non-financial instruments have been defined as follows:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date. A market is regarded as active where a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.
- Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3: Unobservable inputs for the asset or liability.

B. The related information of financial and non-financial instruments measured at fair value by level on the basis of the nature, characteristics and risks of the assets and liabilities is as follows:

(a) The related information of nature of the assets is as follows:

December 31, 2020	Level	el 1 Level 2		Level 3			Total

- (b) The methods and assumptions the Company used to measure fair value are as follows:
 - I. The fair value of the Company's financial instruments is measured by using valuation techniques or by reference to counterparty quotes. The fair value of financial instruments measured by using valuation techniques can be referred to current fair value of instruments with similar terms and characteristics in substance, discounted cash flow method or other valuation methods, including calculated by applying model using market information available at the consolidated balance sheet date.
 - II. Forward foreign exchange contracts are usually evaluated based on current forward exchange rates.
- C. For the years ended December 31, 2020 and 2019, there was no transfer between Level 1 and Level 2.
- D. The following chart is the movement of Level 3 for the years ended December 31, 2020 and 2019:

	2020		2019	
	Convertible		Conv	vertible
	corpora	ate bonds	corpora	ate bonds
January 1	\$	300	\$	-
Gains or losses recognized in profits or losses				
Non-operating income and expenses	(100)		100
Current issuance				200
December 31	\$	200	\$	300
Changes in unrealized gains or losses included				
in profit or loss held in assets and liabilities at				
the end of the period (Note 1)	(\$	100)	\$	100
Note1 : Non-operating income and expenses				

- E. For the years ended December 31, 2020 and 2019, there was no transfer into or out from Level 3.
- F. The Company engaged an external appraiser to perform the fair value measurements being categorized within Level 3, and the financial unit is in charge of valuation procedures to independently verify the fair value of financial instruments. Such assessment is to ensure the valuation results are reasonable by applying independent information to make results close to current market conditions, confirming the resource of information is independent, reliable and in line with other resources and represented as the exercisable price, and frequently calibrating valuation model, performing back-testing, updating inputs used to the valuation model and making any other necessary adjustments to the fair value.
- G. The following is the qualitative information of significant unobservable inputs and sensitivity analysis of changes in significant unobservable inputs to valuation model used in Level 3 fair value measurement:

Convertible bonds Call and put options	December 1, 2020 Fair value at \$ 200	Valuation_ technique Binomial Model	Significant unobservable <u>Input</u> Volatility	Range (weighted <u>average</u>) 45.77%	Relationship of inputs to fair <u>Value</u> The higher the stock price volatility, the higher the fair value
Convertible bonds Call and put options	December 1, 2019 Fair value at \$ 300	Valuation_ technique Binomial Model	Significant unobservable <u>Input</u> Volatility	Range (weighted <u>average</u>) 40.76%	Relationship of inputs to fair <u>Value</u> The higher the stock price volatility, the higher the fair value

H. The Company has carefully evaluated and selected the evaluation model and evaluation parameters. However, the use of different evaluation models or parameters may result in different evaluation results. For financial assets and financial liabilities classified as third level, if the evaluation parameters change, the impact on the current profit or loss and other comprehensive profits and losses are as follows:

	December 31, 2020								
			F	Recognized in profit or loss			Recognize comprehens		or loss
	Input Value	Change		nge		vorable	Favorable change	*	ıble
Financial liabilities Convertible bonds

13. SUPPLEMENTARY DISCLOSURES

(1) Significant transactions information

- A. Loans to others: None.
- B. Provision of endorsements and guarantees to others : None.
- C. Holding of marketable securities at the end of the period (not including subsidiaries, associates and joint ventures): None.
- D. Acquisition or sale of the same security with the accumulated cost exceeding \$300 million or 20% of the Company's paid-in capital: Please refer to table 4.
- E. Acquisition of real estate reaching \$300 million or 20% of paid-in capital or more: None.

- F. Sale of the same security with the accumulated cost exceeding \$300 million or 20% of the Company's paid-in capital: None.
- G. Purchases or sales of goods from or to related parties reaching \$100 million or 20% of paid-in capital or more: None.
- H. Receivables from related parties reaching \$100 million or 20% of paid-in capital or more: None.
- I. Trading in during the reporting periods: The Company signed a forward foreign exchange contract to buy Taiwan dollars to sell US dollars in 2020 with financial institutions. The purpose of this contract is financial hedging. The Company's net loss from engaging in forward foreign exchange contracts in 2020 was approximately \$6,324.
- J. Significant inter-company transactions during the reporting periods: Please refer to Table 1.

(2) Information on investees

Names, locations and other information of investee companies (not including investees in Mainland China): Please refer to Table 2.

(3) Information on investments in Mainland China

None.

(4) Major shareholder information

Major shareholder information: Please refer to Table 3.
